### **FOR IMMEDIATE RELEASE**

**DAILYACCESS CORPORATION ADOPTS NEWKIRK/MASTERYPOINT GUIDANCEPLUS SOLUTION**  
Internet-based investment guidance is available to DailyAccess participants nationwide.

ALBANY, NY, July 28, 2006 — Newkirk, a leading provider of communication solutions for qualified plan providers, today announced that DailyAccess Corporation, a premier provider of retirement plan recordkeeping and administration services, has adopted Newkirk/MasteryPOINT's *GuidancePlus* solution to make online investment guidance available to plan participants nationwide.

"We are very pleased that DailyAccess has chosen to adopt *GuidancePlus*," said Peter Newkirk, president of Newkirk. "This decision demonstrates that cost-effective online investment guidance is an acceptable alternative for plan administrators looking to provide a quality guidance solution to their participants."

"We wanted to provide plan sponsors with an online investment guidance solution for their participants that would be comprehensive and affordable," said DailyAccess' Gregg Wood, COO. "*GuidancePlus* from Newkirk/MasteryPOINT is feature-rich and flexible, and can be efficiently integrated with our system."

Implementation of DailyAccess' *GuidancePlus* online investment guidance solution will be completed in early August 2006. DailyAccess will offer *GuidancePlus* to plan sponsors for their participants through the DailyAccess Participant Website.

### **About GuidancePlus**

*GuidancePlus* is a part of Newkirk's Participant Investor Services (NPIS). NPIS is a resource for retirement plan providers looking to offer cost-effective investment guidance; advice; mutual fund prospectuses; annual and semi-annual reports; and fund data sheets, as well as web tools and educational content, to their plan participants — all with online convenience.

*GuidancePlus* provides interactive education and guided near advice based upon information provided through a retirement plan provider's recordkeeping system. The system uses this information and supplemental information provided directly by the participant to make specific asset class allocation recommendations. *GuidancePlus* provides information and tools to select mutual funds within those asset classes.

### **About DailyAccess Corporation**
